UK Outlook for Friday 19 Nov 2021 to Friday 3 Dec 2021:
Through this period, the chance of wintry showers from the north and northwest continues over higher ground, but also a continuing risk they will occur at lower levels throughout the period. While there is little sign of prolonged, widespread settled weather, conditions are likely to be less stormy and windy. Where there are more settled spells, frost and fog are increasingly likely, with temperatures slightly colder than average. Overall remaining drier than average.
